

MARTIN DARIUS L. ALBA

Caloocan, NCR | (+63) 976 108 4932 | albamartindarius@gmail.com | [LinkedIn Profile](#) | [Github Profile](#) | [Portfolio Website](#)

EDUCATION

Ateneo De Manila University, Quezon City, Metro Manila

BS Computer Science

Expected Graduation 2027

BS Digital Game Design and Development

Expected Graduation 2028

Philippine Cultural College, Caloocan City, Metro Manila

2023

Awards: With High Honors; Earned 8 Silver and 7 Bronze medals in Track & Field competitions

WORK EXPERIENCE

Hackazouk Inc. | Back-end Developer Intern

June 2026 - September 2026

- Contributed to a production backend using **PHP, Laravel, and MySQL**, working on APIs, bug fixes, refactoring, validation, query optimization, and internal tools
- Developed backend components for an internal product using **Python, FastAPI, SQLAlchemy, Pydantic, and Alembic**, including database seeders and API endpoints for querying leave-related data
- Worked extensively with **Docker**, creating and managing Docker images, configuring multi-container environments with **Docker Compose**, for supporting consistent local development and testing workflows

PROJECT EXPERIENCE

Developer Portfolio (*React, TypeScript, Cloudflare Workers, D1, R2*)

2026 - Present

- Built a full-stack developer portfolio using **React and TypeScript**, backed by a serverless **Cloudflare Worker API**
- Designed a **D1 relational backend** with R2 asset storage, edge caching, rate limiting, validation, and GitHub/LeetCode API integrations
- Deployed the application using **Cloudflare Pages and a custom domain**, with backend integration and production content still under development

TimeWizard - Chrome Extension (*JavaScript, Chrome Extensions API, Cloudflare Workers, HTML, CSS*)

2026

- Built a **Manifest V3 Chrome extension** that detects time expressions on webpages and converts them automatically to the user's local time zone
- Implemented **content scripts, background service workers, Chrome Storage, message passing, DOM traversal, and dynamic page detection**
- Built a **Cloudflare Worker API proxy with caching** to handle external time-zone requests while keeping API credentials and service logic off the client

Full-Stack Web Application (*Django, MySQL, CSS, HTML*)

2025

- Built and deployed a full-stack web application with **authentication, role-based account management, and REST API integration**
- Designed and normalized a **MySQL relational schema** and connected frontend interfaces to Django backend services
- Deployed the application on **DigitalOcean**, configuring application environment variables and server infrastructure

Multiplayer 2D Zombie Shooter (*Amazon Web Service, Java*)

2024

- Built a real-time multiplayer 2D game in Java using a **client-server architecture deployed on AWS**
- Implemented synchronized cooperative gameplay with **enemy AI, round-based progression, and continuously scaling difficulty**
- Developed an in-game economy supporting **weapons, perks, upgrades, and progression mechanics**

SKILLS

- Languages:** Java, Python, PHP, JavaScript, SQL, C++
 - Frameworks & Backend:** Laravel, Django, Node.js, REST APIs, FastAPI, SQLAlchemy, Pydantic
 - Databases:** MySQL, SQLite, Cloudflare D1, Alembic
 - Cloud & Infrastructure:** AWS, Cloudflare Workers, DigitalOcean,
 - Tools:** Git, WSL, Postman, Docker, MySQL Workbench
 - Algorithms:** Data Structures & Algorithms, **200+ LeetCode problems solved**
-
